CLOUD+ Course

20hrs

- Learn about cloud technologies.
- Understand the basics of cloud essentials.
- Learn to deploy cloud solutions and infrastructure.
- Apply troubleshooting skills.
- Provide appropriate support.
- Understand the basics of CPU and memory sizing for cloud deployments.
- Troubleshoot security issues, network issues and automation.
- Maintain cloud systems and infrastructure.
- Implement and deploy your own cloud solution.

Price : R12 900

TRAINING INSTITUTE

A+ (Hardware) Course

- Motherboard, Processors and Memory
- Storage Devices & Power Supplies
- Peripherals, Expansions, Display Devices
- Installing & Configuring Printers
- Operating System Basics & System Administration
- Working with Windows Security. Mobile Devices
- Troubleshooting Theory, OS's & Security
- Hardware & Network Troubleshooting

Price : R12 900

CYSA+ Course

Cybersecurity Analyst `40hrs / 2 months`

- Assess and implement information security risk in networks.
- Understand the basics of networking and security.
- Provide and analyse the cybersecurity threats.
- Analyse attacks on computing and network environments.
- Learn about penetration testing and implementation.
- Analyse data collected from security and event logs.
- Investigate and react to cybersecurity incidents.
- Assess security risks within a given organization.
- Apply security measures on assets and networks.
- Learn procedures for post-attack techniques.
- Properly & safely diagnose, resolve & document common security & software issues
- Apply troubleshooting skills.

Price : R28 800

Payment plan: {R14 400 per 20 hours) 2 payments

TRAINING INSTITUTE

DATA+ Course `20hrs`

Data Concepts and Environments
- Boost your knowledge in identifying basic concepts of data schemas and dimensions while understanding the difference between common data structures and file formats.

Data Mining
- Grow your skills to explain data acquisition concepts, reasons for cleansing and profiling datasets, executing data manipulation, and understanding techniques for data manipulation.

Data Analysis
- Gain the ability to apply the appropriate descriptive statistical methods and summarize types of analysis and critical analysis techniques.

Visualization
- Learn how to translate business requirements to create the appropriate visualization in the form of a report or dashboard with the proper design components.

Data Governance, Quality, & Controls
- Increase your ability to summarize important data governance concepts and apply data quality control concepts.

Price : R16 900

TRAINING INSTITUTE

TECH+ Course `20hrs`

IT CONCEPTS & TERMINOLOGY
- Comprehend notational systems,
- Illustrate the basics of computing and explain the value of data and troubleshooting

INFRASTRUCTURE
- Know how to set up and install common peripheral devices to a
- laptop/PC or secure a basic wireless network

APPLICATIONS & SOFTWARE
- Manage applications software, understand the various components of an operating system
- Explain the purpose of methods of application architecture

SOFTWARE DEVELOPMENT
- Comprehend programming language categories, interpret logic, and Understand the purpose of programming concepts

DATABASE FUNDAMENTALS
- Able to explain database concepts, structures, and purpose, as well as Understands methods used to interface

SECURITY
- Understand confidentiality, integrity, and availability concerns of secure devices and best practice methods
